

GRANDEUR DIRECTORY

SIGNLINK DB530

The Grandeur model is similar to the Displaymax and Avant Garde models in that the outer frame has a slimline square edge. The Grandeur is the 'big brother' of the three models which have square edges. It has a very robust frame with internal reinforcing blades which connect together with double corner stakes in each corner. This model is suitable to make large sizes up to 1200 x 3000mm. The sign accepts a SignLink aluminium split batten for mounting on the wall. The split batten locates neatly in a recess at the back of the sign. This model can be set up with special decorative enhancements such as decorator panels from slumped acrylic painted in metallic colour to suit.

Directory panels mount inside the outer frame - they can either be the standard extruded panel type or custom cut panels which are custom made to meet most size requirements. Standard panel heights are 125mm, 100mm, 84mm, 63mm, 50mm, 42mm, 35mm, 30mm, 25mm & 21mm. Panels can be supplied complete with the Signlink 'Perma Print' graphics. This is a permanent printing process whereby the ink is deposited below the surface of the panels. The print is impervious to graffiti and the lettering cannot be scratched off which makes it ideal for situations such as hospitals where it could be located in sterile environments and be subject to cleaning with aggressive cleansing agents.

FEATURES

- Square edge
- Extremely strong frame
- Excellent panel security
- Can be used in recesses - panels front loading
- Fixing utilizes split batten (can result in 1 man installations instead of 2 men for large signs)
- Standard finish is satin natural anodised silver
- Extruded panels have sand blasted finish to achieve maximum colour consistency in panels

OPTIONS

- In/out sliders
- Poster displays can be incorporated in sign
- Paper insert plates
- Panels can have Braille mounted
- Custom painting available.
- Can be set up with protective clear acrylic cover which mounts inside frame
- Can have individual map panels and arrow plates
- Can accept engraving laminate inserts for 35mm H & 50mm H panels
- Can have slumped acrylic decorator panels
- Signlink 'Perma Print' graphics available (photo anodised process)
- Can be set up with header panels digitally printed on the back of clear acrylic
