

Windo® Posters Displays

Pizazz is the exclusive NZ importer and distributor of Windo® Poster Display Systems. Safe, versatile and eye-catching, the FloorWindo® and DeskWindo® ranges can meet the most demanding market needs.

Hardwearing Windo® displays can communicate your message easily and cost-effectively, revitalising previously 'dead' areas like floors and counters. Posters can easily be changed out to keep your messages fresh, so are ideal for sales promotions. Cleaning simply requires a cleaning spray and damp cloth, and displays are light enough to be removed for vacuuming.

Windo poster displays – Specifications & Applications

Safe

FloorWindo® and DeskWindo® is tested and certified by the NFSI and BIA for slip-resistance. FloorWindo CleargriP was tested and approved according to the ASTM and BIA standards in both dry and wet conditions.

Versatile

The FloorWindo® Next Generation series has landed! This innovation makes it easier than ever to change your graphics. It is available in watertight A1, A0 or 4x4 formats that are only 4.5mm thick.

Eye-catching

FloorWindo® displays drive sales by capturing the attention at point-of-purchase, or boosting brand awareness next to product displays. The eye-catching poster is placed flat on the unused floor without the need for messy adhesive. For complex product offers – mobile phone features for example – a FloorWindo® provides a depth of information not possible with small product cards.

DeskWindo®

places all the clear benefits of Windo displays at your fingertips: allowing you to maximise the potential of your counter space. Reach your customers at check out, with a stylish, non-slip display that's very easy to update. Unlike upright die-cut displays, a DeskWindo takes up no valuable counter space.

Make DeskWindo your own.

DeskWindo frames come in stylish charcoal grey as standard. Or customise with your company PMS colours, screen-printed branding, logo embossing: available when you order in our minimum quantities. Ask us how.

DeskWindo PC

– features a top load graphic, to fit A3 or A4 options.

DeskWindo PP

– with side loaded graphics, this option is waterproof and food safe.
To fit A4 and A3 poster sizes, plus translucent 'Ice Tones'.
